

Tennessee Ledger

another new waterfall for 2011 with rounded boulders and new color patterns
11 ft across, 36" deep, 26" high as shown. 3 inch lip to overhang pool not shown.

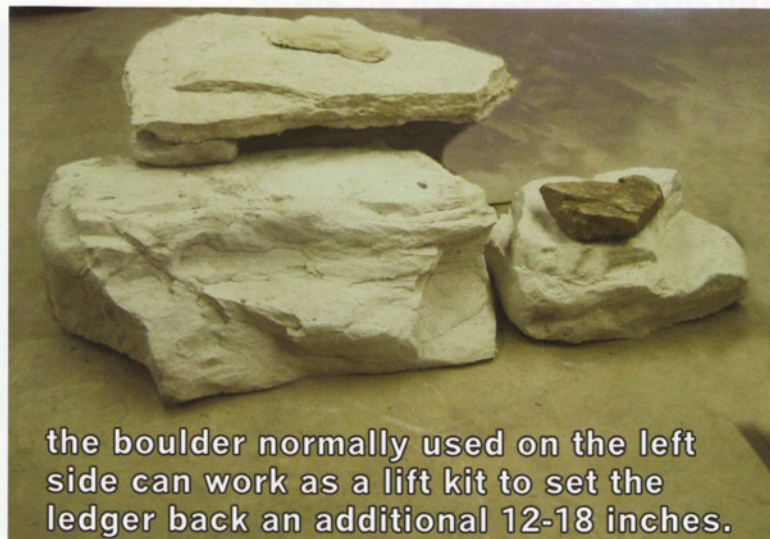

RicoRock[®] INC.
better waterfalls, by design

5 cast rock pieces and 8 natural cobbles in each kit, 900 lbs total

The ledger can be set back to spill on the base rock but seepage may occur unless all water is directed to the pool using good mortar joints and a pad sloping towards the pool. The base pieces must also overhang the pool forming a drip line.

modified ledger with hidden weir

the boulder normally used on the left side can work as a lift kit to set the ledger back an additional 12-18 inches.
